

Announcement

Chair in Genitourinary Medicine

A Chair in Genitourinary Medicine has been created at the Middlesex Hospital Medical School, London. An advertisement concerning this Chair appears on page VI.

The Academic Department of Genitourinary Medicine will have an establishment for a senior lecturer, lecturer, technician, and a secretary.

Funds to finance the Chair have been raised largely by voluntary contributions.

The full title of the Chair will be 'The Duncan

Guthrie Chair of Genitourinary Medicine at the Middlesex Hospital Medical School, London University'. It is named after Duncan Guthrie who, as Director of the National Fund for Research into Crippling Diseases, was instrumental in raising the necessary finance.

It is hoped that the first Professor will take up his post on 1 October 1978, the beginning of the academic year.

Editorial

Cultivation of *Treponema pallidum*

Most students of syphilis would give first priority, in a long list of research needs, to the cultivation of pathogenic *Treponema pallidum*. At the same time, hope of successful cultivation on artificial media has been accompanied by liberal dashes of caution in accepting rumours and even reports of success. The paper by Jones *et al.* (1976) despite its optimistic title, was greeted with muted cheers, for many questions remained unanswered. In this issue (pages 338-339), comes the dismaying report by Foster *et al.* (1977) of the Center for Disease Control, Atlanta, USA, who have been unable to repeat the results of Jones and his colleagues.

Failure to confirm previous reports is not in itself cause for undue pessimism, but when linked with many other unsuccessful attempts the burden of proof shifts back to the original proponents of the method. The principal question it seems is multiplication versus survival during the 10-day period of observation. It was shown by Nelson and Steinman (1948) 30 years ago that pathogenic *T. pallidum* would remain viable for two to three weeks. It was subsequently shown by Weber (1960) that survival was temperature dependent to a degree.

It is in the nature of scientists that they maintain a quiet optimism and restrained expectation concerning important but difficult unanswered biological questions. Modern technology is ever more in-

genious, ready to serve flashes of insight of the individual human mind. However in the beguiling phrase of lottery promoters 'You have to play to win', there are ever fewer recruits who choose to match their wits against the treponeme.

It would be useful for future workers in this field to have a full-scale review of the long list of efforts that have failed. Much of the work remains unreported, and it would be the task of a reviewer to add to published material the probings of workers of the past half-century before they are lost in the haze of time. Indeed from such efforts have come contributions which, while short of the original goal, have sparked significant advances in the treponemal field.

THOMAS B. TURNER

Notices

International Union Against the Venereal Diseases and the Treponematoses

29th General Assembly, Leeds 21 to 25 May 1978

(Immediately after the MSSVD Spring Meeting at Leeds).

Conference Secretary: Dr M. A. Waugh, General Infirmary at Leeds, Leeds LS1 3EX.

Delegates wishing to read papers should write to the Programme Secretary, Dr J. W. R. Harris, Praed Street Clinic, St Mary's Hospital, London W2, as soon as possible, enclosing a summary of the proposed paper. Official languages: English and French with simultaneous interpretation.

PROVISIONAL PROGRAMME

Sunday, 21 May 1978

Delegates, wives, and guests arrive at the Dragonara Hotel or the Merrion Hotel.

15.00–18.00 Registration at the Dragonara Hotel.

16.00 Executive Committee Meeting, Dragonara Hotel.

18.30 Cocktail party, Dragonara Hotel.

Monday, 22 May

9.00 IUVDT General Assembly, Opening Ceremony, Rupert Beckett Lecture Theatre, University of Leeds, followed by scientific sessions.

9.00–12.30 and 14.30–17.30 *Theme I* Recent advances in microbiology and immunology of gonorrhoea with their practical application including treatment.

Tuesday, 23 May

9.00–12.30 *Theme II* Recent advances in the immunology of syphilis.

14.30–17.30 *Theme III* Recent advances in the study of STD due to viral and other agents. (Theme co-ordinator Dr R. D. Catterall).

Evening. Civic reception and banquet, Civic Hall, City of Leeds.

Wednesday, 24 May

9.00–12.30 *Theme IV* New trends in the epidemiology of STD. (Theme co-ordinators: Dr G. Causse, Dr T. Guthe, and Dr A. Siboulet).

14.30–16.30 29th General Assembly of the IUVDT.

17.00–18.30 2nd Executive Committee Meeting, Dragonara Hotel.

Evening. Banquet.

Thursday, 25 May

Excursion, by motor coach, to the City of York, where lunch will be arranged. Delegates may return to London direct from York if they so desire.

Buffet lunch available for delegates each day at the University of Leeds.

NOTES

The registration fee for the conference and the 29th General Assembly of the IUVDT will be £20 for delegates and £10 for wives or guests.

Each scientific session will be held in the Rupert Beckett Lecture Theatre, University of Leeds.

A programme of events and excursions for the benefit of wives and guests of

delegates is being arranged. Charges will be in addition to the registration fee.

Both the IUVDT General Assembly and the MSSVD Spring Meeting may be booked with Hoods Tourist Agency Limited (ABTA) 169 The Headrow, Leeds, LS1 2QU (Telephone 0532-452857/8/9). They will be happy to arrange and attend to travelling and hotel requirements. IUVDT delegates are welcome to attend the MSSVD scientific sessions and to join in the social events.

Hotel accommodation covering the period of the General Assembly has been arranged as follows:

The Dragonara Hotel, Neville Street, Leeds

(Single room and English breakfast—£17.50 plus VAT per person a night. Twin-bedded room and English breakfast—£12.00 plus VAT per person a night).

The Merrion Hotel, Merrion Centre, Leeds
(Single room and English breakfast—£12.50 inclusive of VAT per person a night).

Twin-bedded room and English breakfast—£10 inclusive of VAT per person a night).

Please note that for the period of the MSSVD Spring Meeting delegates staying at the Merrion Hotel will be charged a flat rate of £10 per person a night, inclusive of English breakfast and VAT, whether they are in a single or a twin-bedded room.

Subscriptions

As noted in the Secretary's report (see page 398), many members had to be sent reminder letters before they paid their full subscriptions. This is expensive in time and money. All members are urged to pay the full amount promptly.

- N. gonorrhoeae*, antibody response to initial infection with, 75*
- N. gonorrhoeae*, atypical, 775
- N. gonorrhoeae*, autolysis of, 75*
- N. gonorrhoeae*, bactericidal antibody in genital infection due to, 331
- N. gonorrhoeae*, bacteriocin production by, 151*
- N. gonorrhoeae*, bicarbonate containing growth medium for, 269*
- N. gonorrhoeae*, capsule of, 331 bis
- N. gonorrhoeae*, carbon dioxide requirements, of 150
- N. gonorrhoeae*, *Chlamydia* infection and, treatment of, 77
- N. gonorrhoeae*, condyloma-like lesions possibly caused by, 330*
- N. gonorrhoeae*, detection of, genetic transformation in, 150
- N. gonorrhoeae*, effect of vaginal lubricants on, 207
- N. gonorrhoeae*, genital inoculation of male baboons with, 332
- N. gonorrhoeae*, growth inhibition of, 269*
- N. gonorrhoeae*, growth interference of, 150
- N. gonorrhoeae*, growth of, 331
- N. gonorrhoeae*, identification of, 150
- N. gonorrhoeae*, identification of, in tonsillo-pharyngeal specimens, 74*
- N. gonorrhoeae*, immunity to, in the chimpanzee, 75
- N. gonorrhoeae*, immunological and serological diversity of, 268 bis
- N. gonorrhoeae*, *in vitro*, susceptibility of, to 66 antibacterial agents, 76
- N. gonorrhoeae*, L-forms, 75*, 151*
- N. gonorrhoeae*, New York City medium for recovery of, 333*
- N. gonorrhoeae*, penicillin penetration into phagocytes containing, 332
- N. gonorrhoeae*, penicillinase producing, 75 bis
- N. gonorrhoeae*, pyocin sensitivity of, 333*
- N. gonorrhoeae*, serogrouping of, 269
- Neonates, herpes virus type 2 encephalitis in, 270
- Neuralgia, recurrent conjugal due to herpes virus type 2, 152*
- Neurolues, decline of, 267*
- Neurosypilis, CSF penicillin levels in, 266
- Neutral red, action of, on herpes virus, 270, 271
- New York, asymptomatic gonorrhoea in, 207*
- New York City medium, field evaluation of, 333*
- Nystatin in recurrent vulvovaginal candidosis in pregnancy, 209
- Obstetric hospital, herpes virus in, 152*
- Obstetric patients, gonorrhoea in, 75*
- Oncogenesis and Herpesviruses II, 78*
- Ophthalmia neonatorum—chart review, 153*
- Ophthalmia neonatorum, chlamydial, 78*
- Osteomyelitis, gonococcal, 206
- Papanicolaou smear in diagnosis of gonorrhoea, 150, 207
- Pediculosis, treatment of, 153*
- Pelvis, cancer of, simulated by granuloma inguinale, 271*
- Pelvis, inflammatory disease of, intrauterine contraceptive devices and, 153 ter
- Penicillin, effect of, on *Chlamydia trachomatis* in tissue culture, 270
- Penicillin in gonorrhoea, is it passé?, 333*

- Penicillin resistance of gonococcus in Thailand, 269*
 Penicillinase producing gonococci, 75 *ter*, 76* *ter*
 Penis, psoriasis of, 336*
 Periappendicitis and salpingitis, gonococcal, 149*
 Perihepatitis and hyperamylasemia in gonococcal salpingitis, 149
 Placenta, human, as possible reservoir of chlamydial infection, 78*
 Pregnancy, asymptomatic gonorrhoea and, 268*
 Pregnancy, cytomegalic virus disease in, 79*
 Pregnancy, genital infections in, 336*
 Pregnancy, gonococcaemia in, 206, 330
 Pregnancy, gonococcal salpingitis in, 206
 Pregnancy, oropharyngeal gonorrhoea in, 330*
 Pregnancy, recurrent vulvovaginal candidosis in, treatment of, 209
 Prostate, cancer of, herpes virus type 2 and, 271
 Psoriasis of the penis, 336*
 Rapid plasma reagin test, automation of, 330*
 Reagin screen test for syphilis, 328
 Reagin screen test, qualitative evaluation of, 148
 Reiter's disease, 335* *bis*
 Reiter's disease following *Shigella flexneri* 2a infection, 335*
 Reiter's disease, HL-A27 in, 151*
 Salpingitis, acute, *Chlamydia trachomatis* infection in, 333
 Salpingitis, *chlamyiae* subgroup A and, 208
 Salpingitis, gonococcal, hyperamylasemia and perihepatitis in, 149
 Salpingitis, gonococcal, in pregnancy, 206
 Salpingitis, gonococcal, screening for, 207*
 Salpingitis, periappendicitis and, gonococcal, 149*
 Scabies, treatment of, 153*
 Scalp abscess in foetus due to gonococcus, 330*
 Sepsis, gonococcal, benign, possible mechanism for skin lesions in, 268
 Sepsis, gonococcal, secondary to fetal monitoring, 267
 Sexual problems clinic, experience in, 79*
 Sexually transmitted diseases, 79*
 Sexually transmitted diseases, *chlamyiae* as agents of, 270*
 Sexually transmitted diseases, conference on 272*
Shigella flexneri 2a infection, Reiter's disease following, 335*
 South Carolina, antibiotic resistant *N. gonorrhoeae* in, 208*
 Spatula, cervical, comparative trial of Ayre and Arrovical types of, 272
 Spectinomycin in gonorrhoea, 333
 Sulphafurazole in urethritis, 208
 Surgery in primary syphilis of the anus, 204*
 Syphilis, complement fixing antibody in, 204
 Syphilis, congenital, early, bone lesions in, 73
 Syphilis, congenital, presenting as anaemia, 73
 Syphilis, early, destructive bone disease in, 266
 Syphilis, experimental, immunoglobulin levels in, 204
 Syphilis, foetal, in the first trimester, 73
 Syphilis, glomerulonephritis due to, treponemal antigens in, 205 *bis*
 Syphilis, homosexuality and legislation, 153*
- Syphilis infections mimicking neoplastic disease, 328
 Syphilis, MHA-TP test for, 267
 Syphilis, primary, of anus, role of surgery in, 204*
 Syphilis, secondary, bone scanning for skeletal involvement in, 74
 Syphilis, secondary, hepatitis and bone destruction in, 204
 Syphilis, secondary, Jarisch-Herxheimer reaction in, 148
 Syphilis, secondary, seroreversal after treatment of, 75*
 Syphilis serology, comparative statistical study on, in metropolitan and transMediterranean areas, 149*
 Syphilis serology, reagin screen test in, 328
 Syphilis serology service, antenatal, computerisation of, 149*
 Syphilis, tertiary, in Denmark, 1961-70, 267*
 Syphilomas, skin, treatment in rabbits of, 149
 Tetracycline in gonorrhoea, 333 *bis*
 Thailand, changing penicillin resistance of gonococcus in, 269*
T. pallidum, immobilising activity of, 74 *bis*, 75
T. pallidum infection in mice, 206
T. pallidum, infection in rabbits, 205, 329
T. pallidum, Nichols strain, 149, 267, 329
T. pallidum, persistence of, following penicillin G. therapy, 266
T. pallidum, treatment of skin syphilomas due to, in rabbits, 149
 Treponemal depigmentation, 148
T. vaginalis, 151*
T. vaginalis, conjunctivitis and, 209
T. vaginalis, diagnosis of, 78
 Ureaplasmas, growth of, in bovine oviductal cultures, 77
 Ureaplasmas, urethritis associated with, sulphafurazole and aminocyclitols in, 208
Ureaplasma urealyticum, 334
Ureaplasma urealyticum, identification of, 151*
Ureaplasma urealyticum, significance of, 78*
 Urethritis, chlamydial and ureaplasma-associated, sulphafurazole and aminocyclitols in, 208
 Urethritis, gonococcal, treatment with fosfomycin, 209*
 Urethritis, non-gonococcal, and related oculogenital infections, 270*
 Urethritis, non-gonococcal, T-mycoplasmas in, 269
 Urethritis, non-specific, lymecycline in, 209*
 Urinary tract infection, marital, 153*
 Uvetis, corticosteroid-induced, positive FTA-ABS test in, 149*
 Vagina, flora of, in asymptomatic women, 153*
 Vagina, quantitative microflora of, 272*
 Venereal disease aboard a US navy destroyer, social aspects of, 271*
 Venereal disease and the homosexual, 272*
 Venereal disease, problems of, in general practice, 272*
 Vulva, histology of, after neutral red photoinactivation of herpes virus, 271
 Vulvovaginitis, familial allergic seminal, 210*
 Waits, BCG vaccination in treatment of, 335
 Women, asymptomatic, vaginal flora in, 153*
 Yaws, treponemal depigmentation in, 148
 Yeasts, vaginal, isolation of, 152
